? How to Set Up Residential Proxies from ProxyUniverse and Use Them with AdsPower

1 Purchase and Configure Proxies

Purchase the required amount of gigabytes on ProxyUniverse.
After payment, you'll be redirected to the proxy setup page.
Choose the proxy type: UDP Socks5/HTTP.
Configure rotation if needed.

2 Generate Proxies

Select the desired region (city or country).
Generate the proxies.
The proxies you copy will be in the following format:
user:pass@ip:port

3 Add Proxies to AdsPower

Copy the generated proxy.
Paste the details into the Proxy section of your AdsPower profile.

4 Verify the Connection

Launch the profile in AdsPower.
Go to whoer.net or a similar site to ensure the proxy is working correctly.
