Thread: [Viable Payment Options For Ewhoring](#)

JasonBeanz - January 4, 2025, 7:34 am

Hi guys, I'm planning on going down this journey again and would like to see if anyone has any viable payment options besides the usual Paypal/Gift cards etc..

I have used PayPal in the past and have cashed out over 2K before the acc got suspended...

I am not based in the US/UK and would like to know if anyone has any alternative payment options besides Crypto as many ppl find it "scammy"

You can use Throne wishlist (cash gift, not items) to accept payments. Or Buymeacoffee.

Tho find a way to get a Cashapp account even if you don't live in the US. It's the most popular option and 99% of guys have it AND trust it.

If you know what you're doing you can use Stripe and hook it up to your own custom website and accept CC payments that way.

Have you tried using cashapp? And also with paypal, you need to have the sender say stuff like for groceries, food, dinner etc...

crypto is the best way, you just need a reason to make them pay on that way and they can't refund it too.

Hello! With this, stripe into a website. Would the customer be able to see where the money goes?

As in the name of the one who has the stripe into the website.
Also , would they be able to make disputes ? Thank you!

lol like I said you just need to make them trust you, like small talk for them to create crytpo accounts or their cashapp btc and most simps are going to pay you in any platform if they saw you trustworthy
