Thread: [Gmail account creator](#)

doon - January 5, 2025, 5:28 am

Looking to sell access to my Gmail account creator that creates accounts in the country that you provide to the bot.

This is not just a copy paste of some open source project. Everything is built from the ground up to be robust and persist through updates that google puts out. If there is a breaking change from google it will be fixed quick.

Gmail accounts can be created once you have funded the required accounts for \$0.05-1 depending on country. A proxy subscription is also required which is \$20 a month.

Updates to the program will be provided for life and I am available pretty much anytime. If you have a question or there is a problem I will respond within less than 24 hours.

Accounts are currently exported into a service:email:password format. If you have extra requests for the accounts we can talk.

I'm only selling this as a lifetime access product.

\$150 USD

If you want more info or want to purchase, please DM me or start the contract and I will contact you.
