Thread: [AI infrastructure replacing humans.](#)

Blazin - January 7, 2025, 11:15 pm

What do you guys think the future looks like? Do you think he's onto something?

7 - January 7, 2025, 11:20 pm

For me it shows

[Image: MCT3EhF] is broken

Sorry about that on mobile and had a few drinks updated.

7 - January 7, 2025, 11:37 pm

Yeah no worries.

Let's be real. The only people who should be worried about being replaced by AI are the backend of the human race, the people performing mundane tasks that's so repetitive and lacks initiative that replacing them with AI would be easy.

AGI is more concerning than AI itself IMO.

People have been happy sitting back, no progressing, buying the latest tech to check Instagram for so long, they haven't evolved with the minority of thinkers, there just thought shit is getting easier. It's time to wake up NEO.

AI has made my workflow faster, increased the number of clients and products I can deal with, and increased my productivity tenfold.

I see kids sitting in AR parks and Humanoids becoming real and AGI taking over... people want the matrix, sadly.

This is just my opinion, it's not fact and means no disrespect to anyone

Yeah I agree with a lot of what you said tbh. They are starting to train ai to do dentist work and so forth. I believe China has started it. The next 100 years will be wild and the backend will definitely be the absolute first to go. They've already started to replace dentists with Ai. They had Ai replace a crown in 15 minutes

<https://youtube.com/shorts/oHejZvRZkcY?si=XuulgaW4g3jdG5tY>

If they can fully replace dentists, that's a wild future.

Yeah I mean for medical purposes I definitely can see it beneficial.
The British would have no excuse then for their tooth decay (Im British I can say that)

But replacing a crown is not too invasive from experience it is basic
But when it can do a Sinus lift, ill be impressed.

Ramsey - January 8, 2025, 3:54 am

Yap. Can agree. AI will be assistants for sometime until the error margin is better than a human.

PappyProxy - January 8, 2025, 5:38 pm

more like better infrastructure for faster computing time.. ;)

It's just a matter of time before it can do a Sinus lift, I'd say not IF but When. Imagine the next 30 years or on your dying bed what AI will be at.

Indeed AI doesn't need a break.

That's true, but AI will be layered in so many things in the future. This is just the beginning ERA of it. It's already being added into Amazon & Dentistry and the medical field. The world is looking at how to incorporate it and following AI closely.

plops - January 9, 2025, 9:07 am

I think its a bit worrysome, but I agree it will mostly affect those with the mundane jobs and 0 motivation to grow.

If the matrix as we know it doesnt happen, that group of people will have to adapt out of gta role playing and start farming their own food. Starting little pockets of slum societies.
