Thread: [Reseller to sell my product on multiple forums for %\[legit, legal product\]](#)

SpamHer0 - January 8, 2025, 9:40 am

As the title says it all. I have a security based product that can Instantly Search URL:LOGIN:PASS Leaks Across few Billion+ Credentials! which I curated over years and continuously being updated. The database, updates, licensing, website , sales thread content ... etc all will be taken care by me. Product is subscription based and you get % out of each purchase & renewal.

Since I'm working on other tools, I am looking for a trusted reseller who is active and premium upgraded on multiple forums similar to HF or others. He should be able to post the sales thread and handle the sales. Interested people can ping me with proofs on telgrm: @hunter_dog14

(I am open to sell the entire project or subscription to individuals)

Off topic:

Are you selling the product on this forum already? If yes, what is the price of it?
