Yes yes it's time to fill your brains with utter garbage and watch this chick chug down a mug of piss. She is a very healthy woman and swears she drinks the pee to stay fit and hot!

Nothing but pure class ?

Does it cure cancer? Maybe. Someone can try it out themselves I suppose.

wow, that's classic, i got omni, hope you feeling better Omni,?

Epic - January 8, 2025, 3:35 pm

Oh my god she literally said "I like warm pee.. it's comforting" and I lost it ?

2.3 liters a day.. that is crazy. I can't imagine that's making a net impact on the body. Gross regardless lmao. She's definitely got a bit of a mental health case going on too from the video.

A quick google led me to the wikipedia page for "urine therapy", which oddly enough I've heard of before. One of my friends said his uncle did it back in the day or some shit. Wild. No therapeutic effects reported in the article...

I've seen some show episodes, usually just grosses me out. Most of them have some sort of mental illness. It's sad how mental illness is now just seen as "strange". We used to lock people up in asylums if they behaved this way. I bet she votes too. People like her are destroying our society and we are normalizing it too often.

Yes, I think she is crazy also, but to each to their own, I bet she will live longer than someone drinking that much beer everyday. Funny thought...

Actually it's sort of safe to drink one round of urine. After that it's a buildup of toxins. Urine is literally toxins being removed from your body. The more yellow, the more toxins in most cases. You can see her urine is crazy yellow because she probably doesn't bother drinking water anymore. It's kind of amazing it hasn't killed her or made her incredibly ill. But it's TV so who fucking knows how true the story really is.

Yeah I'll let you know when I post it. It was an idea I got from another HF user who told me I was under-utilizing my assets and I should market what I have in another way and to a different group of people because I have what they desperately seek. So I'm going to do a write-up based on what he told me and then see how it goes.

Well it'll be a little costly for the consumer because I have to involve my devs making a custom apk for each customer, but the benefits in the end far outweigh similar products on the market because I already have one major advantage that most of the competition lacks right now. And this involves sms interception and sending sms as the actual user. You'll understand the project in full once I make the formal posting.
