Have you guys seen this coin? Super bullish, great tech, great team, in my opinion has potential to become the leading AI Agent or as they are trying to rebrand "Digital Workers" They also have functionality to trade autonomously and have seen a lot of success in the beta phase.

Sad i didnt get in early. Sidelined but hoping for DeFAI as a whole to get big.

GRIFFAIN is currently number 1 in the category on cmc and cg

Currently about 90% of my portfolio is in ANON.

I personally don't think it's too late. At minimum this should be a \$1B coin especially based on upcoming partnerships, also take a look at \$citadail and \$NAI 2 tokens that Griffain minted

I'm also vested into trisig just won gem vote to get on kucoin super cool tech

Everything is so discounted rn this correction is going to be insane
