Thread: [Twitter Mass DM Script UP TO 144K DMS IN 24HRS FOR SALE](#)

otnet66 - January 9, 2025, 6:47 pm

Why You'll Love It (Even If You Don't Need It)

Sky-High Volume

Fire off up to 50,000+ DMs a day. With 50 bots running, you're looking at a mind-blowing 144,000 DMs in just 24 hours. "Overkill" never felt so good.

Effortless Automation

Skip the hassle: automated logins, interval timing, and advanced "humanization" features make your spamming—oops, messaging—smooth and stealthy.

Bot Swapping Magic

Tired of bans and captchas? This script auto-swaps out banned or stalled accounts with fresh ones from your secret stash. Because who has time to babysit bots?

Scrape & Load

Directly scrape users with DM-enabled accounts (80% implemented and counting) or load your own user lists. Fuel your unstoppable message machine with zero manual effort.

Fully Stealth

Integrated proxy support, natural typing delays, and sleep cycles make your operation slip right under Twitter's radar. It's like you're actually a human who never sleeps!

Arkose Bypass & Rate-Limit Mastery

This powerhouse bypasses Arkose challenges (sometimes it takes a bit, but hey—it works!). Plus, it's tuned to navigate Twitter's rate limits like a pro.

Customizable Price

Ranging from \$100 to \$500, depending on the person (and your negotiating skills). Because who doesn't love the thrill of a good haggle?

No Duplicates, No Wasted Time

If a user can't be DMed, it skips seamlessly. No repeated recipients or missed opportunities here—this script is all about maximum efficiency.

Real-Time Progress & Stats

TQDM progress indicators, fail logs to CSV, end-of-run summaries—you'll see exactly how many messages you're sending (and, let's be honest, you'll love those eye-popping numbers).

Full Support & Future-Proof

Need help? You got it. Expect even more advanced features in v2—because once you start mass DMing, you can't go back.

But I Don't Even Want This Thing...

That's what everybody says—until they realize how easy it is to reach tens of thousands of users on autopilot. Then they whip out their wallet in a heartbeat. Trust us, you'll be hooked.

Buy it now—not because you need it, but because, well, you might as well. It's there. It's awesome. And deep down, you kind of want to see it in action...don't you?
