RETWEET LIKE AND REPLY UNLIMITED TO A TARGET PROFILE
BYPASS ARKOSE (REQUIRES 10 MINUTES TO 5 MINUTES TO DO SO)
EASY SETUP ALL IN A EXE
HEADLESS BARELY ANY RAM OR CPU USAGE EVEN WITH 50 BOTS RUNNING

All-in-One Twitter Automation

Streamline your Twitter outreach and engagement with one simple, user-friendly solution.

Overview

Our All-in-One Twitter Automation tool combines two powerful modes:

Mass DM – Automate direct messages to thousands of potential leads or contacts.

Mass Reply – Quickly find and engage with relevant tweets, optionally liking and retweeting along the way.

With an intuitive graphical interface (GUI), you can configure both modes without ever touching command lines or separate scripts. Simply launch the .exe, fill in your details, and let the tool handle the rest!

1. Mass DM Mode

Turn multiple Twitter profiles into your automated outreach engine.

Key Highlights

Multi-Profile Support

Manage multiple Twitter accounts at once. Load each account's credentials from a simple .env file—no manual logins needed.

CSV Integration

Import a list of target usernames from a CSV file. The tool will distribute these targets across your selected profiles automatically.

Headless or Visible Browsers

Choose whether you want to see the browsers in action or run them silently in the background.

Message Customization

Enter the exact DM text you want sent. Write anything from personal greetings to promotional announcements.

Built-in Rate Limiting (AND AUTOMATICLY PREVENTS IT)

Configure how many DMs each profile can send per hour to stay within safe limits and reduce spam warnings.

Profile-Specific Data

Each profile keeps its own Chrome user data, so if you're already logged in on that profile, you won't get re-prompted with 2FA or extra login steps (unless needed).

Benefits for You

Save Time – Automate repetitive manual outreach, freeing up your schedule.

Expand Reach – Tap into multiple Twitter accounts to connect with a broader audience faster.

Maintain Control – The tool carefully paces your DMs to respect rate limits and avoid triggering spam alerts. (ONCE EVERY 30SECS)

2. Mass Reply Mode

Engage with tweets at scale: search, like, retweet, and reply—instantly.

Key Highlights

Search by Profile or Hashtag

Target a user's tweets or scrape live results for a hashtag. Perfect for brand monitoring, trending topics, or responding to fans.

Boost Mode

If activated, the bot will like, retweet, and reply—all in one go. Great for maximum engagement.

TweetNow (Optional)

Need to SPAM posts an update across all your accounts simultaneously? Enable "TweetNow" to have each account tweet a custom message. (HOW THIS IS USEFUL U CAN GET ALOT OF VIEWS FROM ANY NICHES BY MAKING A PROMO POST IN HASHTAG)

Dynamic Scrolling

The bot automatically scrolls through the timeline or search feed, collecting tweet IDs until you reach your desired amount.

Select How Many to Reply

Control exactly how many tweets to engage with—limit replies to 10, 100, or more. The choice is yours.

Avoid Repetition

The tool tracks which tweets were already replied to, so you never risk replying twice to the same tweet.

Benefits for You

Efficient Engagement – Rapidly respond to relevant tweets and jump on trending conversations.

Build Brand Awareness – Likes, retweets, and replies let you show presence and draw followers

back to your profile.

Flexible Flow – Choose whether to see each browser in real time or run fully behind the scenes.

Easy-to-Use GUI

No coding or console input required!

When you launch the All-in-One Twitter Automation .exe, you're greeted by two big buttons:

DM Mode

Mass Reply Mode

Each opens a user-friendly form. Enter (or browse for) your .env path, CSV location, or hashtag. Set your daily or hourly limits, then click start. Watch as the logs roll by, showing your progress every step of the way.

Why You'll Love It

Time-Saving – Automate everyday tasks that would take hours manually.

Safe & Customizable – Built-in rate limiting and flexible settings keep your accounts in good standing.

Multi-Account Scalability – Whether you manage 2 accounts or 50, the tool handles them with separatEly

One-File Simplicity – Distribute a single .exe (no separate .py scripts or library installs needed on the target PC).

Technical Notes

Requires a .env file with your Twitter login credentials (e.g., TW_EMAIL_1, TW_USERNAME_1, TW_PASSWORD_1, etc.).

Uses undetected_chromedriver to minimize bot detection. (AND MANY MORE FEATURES TO STAY UNDETECTED AND PREVENT SUSPENSION) BTW GOOD ACCOUNTS ARE PREFERRED FOR MAXIMUM STABILITY

Ensure you have write permission for the driver or run as admin if needed.

The tool logs to:

multi_profile_dm_no_extension.log (info logs)

multi_profile_dm_errors.log (errors)

Supports Windows.

Just place your .exe and .env in the same folder, plus any CSV files you want to import.

Get Started

Run the .exe – No Python install required.

Pick Your Mode – DM Mode or Mass Reply Mode.

Fill the GUI – CSV path, .env location, desired text, etc.

Start – The script logs in and does the job automatically.

Check Logs – Watch the console or log files for real-time progress. (U CAN LOGIN INTO THE ACCOUNTS WHILE THEIR DOING THEIR THING ASWELL)

That's it! You'll have a powerful, user-friendly tool that amplifies your Twitter presence—DM hundreds of users or reply to relevant tweets across multiple accounts.

All in a single .exe—the All-in-One Twitter Automation solution. Enjoy!

[contract=tid]Start Contract[/contract]

THE "NOT RESPONDING" means its just outputtin to the console i can show live showcase of it

working etc etc

Sticky Bot - *January 10, 2025, 1:38 am*

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on Jan 17, 2025. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).
