If you're giving out a vouch copy or a discounted copy, I will buy and write a detailed review.

Good luck with sales!

Is there a topic owner? I want to know who has tried this program.

I tried this shitty crypter it was a terrible experience he takes money and after delivering files he won't respond to you and if you message him he will cancel the license the crypter itself is detected by Windows defender but he never updates it + most of features on it are just ui and not actually working
