Thread: [Cash advance apps - Brigit, Empower \\$15 per referral](#)

AAC_ - January 11, 2025, 6:04 pm

OK, so there is an opportunity here to make a little instant cash that you can use tonight. If you play it smart, maybe you can come up with a scheme where you end up making a lot more. Up to you.

Here's the the tip.

The Situtation

Brigit and Empower are both "Cash Advance" apps.

They let you borrow a small amount of money(between \$50 to \$200) instantly and only require one thing: A working bank account linked through plaid.

You must sign up for each, and there a small fee for each, \$8 for Brigit and I believe \$5 for empower. But since they are both going to give you money right away the fee pays itself. These are loans that the owner of the bank account will have to pay eventually(usually within 2 weeks) which is all fine and dandy, but we're interested in their referral programs!!!

Both apps offer will payout instantly, to both of us.

So you get a prize, and I get the same price if you click the link, link an account, and accept any size advance(it can be \$5.)

In other words if you are strapped for cash and can't buy your Little Ceasar's pizza because you're short a dollar then today is your lucky day.

You will eat a decent meal tonight and possible even have enough money to start that Shopify you've been slacking on or whatever.

Stay tuned because this is part of a series on going from 0 to hero that I am finally getting around to now.

The Breakdown

If you are down to your last \$5, join now

get an advance

cash out instantly

receive your referral bonus

eat a pizza

come back right away and share your own 2 referral links to further the project

do something profitable FAST with your advance(we're gonna talk more about that in a different post)

????

profit

Further Notes

This is kinda limited since Empower only gives each person \$5 and Brigit gives each person a \$15 bonus.

But if you understand how to "ride the cashflow" you can create a chain workflow where you can pay the oldest loan with a new one and create a cashflow cycle.

Yes it is exactly what it sounds like, congratulations you're making moves now.

There are a ton of other cash advance apps out there however they require you to enter an SSN and be a US Citizen.

These two don't!

To improve the method you'll need several app profiles, several bank accounts, several plaid accounts, and then you can go clicking your own links and make a fun little circle for yourself and your family and run that puppy to the stratosphere.

BUT I CANNOT LEGALLY RECOMMEND OR SUGGEST THAT YOU DO THAT SO I DO NOT: LEGALLY RECOMMEND OR SUGGEST THAT YOU DO THAT.

Thank you and good night.

The Links

These are apps so click the link from a phone.

Don't forget to share your own link so someone else can click yours and we can make a chain.

Like I said, to make a circle get made, kid.

For Empower:

Empower we both make \$5 after you sign up and take out any size instant advance(even \$5 lol)

https://empower.onelink.me/rYvL?pid=Referral&c=5for5&af_sub1=UEFHNP

For Brigit:

Brigit both make \$15 after you sign up and take out any size instant advance(even \$15 lol)

<https://brigit.app.link/85ucMeSoWNb>

TL;DR:

These apps lend you money, and give you and your friend a small bonus for referrals. Double whammy. Make moves at high speed to start from 0 and maybe make enough to feed the beast and keep playing forever.

Stay tuned for tips on moving at speed and riding the waves.

Post your questions or concerns, I love conversations about cashflow.
