Thread: [Need Beta Testers - ShadowNET RAT](#)

ShadowCipher - January 13, 2025, 11:10 am

? Seeking Beta Testers for ShadowNET RAT! ?

I'm excited to invite you to become a beta tester for my upcoming Remote Administration Tool (RAT)! As a beta tester, you'll gain one month of free access and an opportunity to shape the final version by providing valuable feedback.

? Why Join?

Early and exclusive access to the RAT.

Fully unlocked features during the beta period.

Direct influence on the development process by providing feedback and suggestions.

? Key Features

This RAT is packed with features that offer unparalleled control and flexibility.

"? Features List (Click to Expand)" ([Click to View](#)) Task Management: Add tasks to execute upon client connection.

Startup Options: Utilize multiple techniques to ensure startup persistence.

Self-Management: Install or self-delete as needed.

Process Persistence: Keeps the client running reliably.

Client Development: Built in C/C++ for performance and low footprint.

Build Options: Choose between x86 or x64 builds.

Loader Builder: Generate extremely small loaders for clients.

Group Management: Organize clients into groups with customizable colors.

File Manager: Full-featured remote file management.

Remote Commands:

- Execute remote PowerShell commands.

- Remote CMD access.

Process Management:

- Watch and terminate processes.

- Full process control.

File Transfer: Send files from your PC or directly from the web.

Webcam Control: View webcam feeds remotely.

Remote Desktop: Full remote desktop access and control.

Key Logger: Log keystrokes securely.

Password Recovery: Recover stored passwords.

Recovery Tools: Includes FileZilla account recovery.

UAC Bypass: Bypass User Account Control restrictions.

Critical Process Flag: Set processes as critical to prevent termination.

System Restrictions:

- Disable Task Manager.

- Disable Registry Editor.

- Disable Windows Updates.

- Disable Windows Defender.

Hosts File Editor: Edit the hosts file remotely.

Communication Tools:

- Chat functionality.
- Send customizable message boxes.

Web Interaction: Redirect clients to websites (visible or hidden).

Crypto Clipper: Intercept and modify cryptocurrency addresses.

? How to Apply

To join the beta testing program:

Send me a private message with a short description of your experience and interest.
Mention any specific features you'd like to test!

? Important Notes

Limited slots available for beta testers—apply now!
Please provide detailed feedback to help improve the tool.

Have Questions?

Drop your questions below or PM me directly. Let's make this RAT the best tool it can be! ?

Awesome. I'll send you details soon.

As far as pricing, I haven't come to a definitive decision. But it will most likely be available for 1, 3, and 6 month licenses. And not expensive either. I want it to be affordable.

Dsk.Compressor - January 13, 2025, 11:21 am

It will depend on the business we are going to undertake
