Thread: [REAL TIME AI Voice which sounds like Human](#)

inceptor - January 14, 2025, 1:11 pm

Anyone knows where i can generate AI voice in real time
i want a british accent and it should sound normal ..its for talking to other person ..
i want this in real time ..anyone knows any good software for this ?

there are some text to speech AI converter i am looking for real time speech to speech AI converter
lets say i speak in some asian accent but the output should be in real time brit accent(of course should sound human)

If you look here, or at huggingface.co your bound to find it at either one of these places.

I would suggest you ElevenLabs you can record your own voice and transform it with AI and it sounds very realistic, also you can earn money the more users use your voice the better you earn.
