Thread: [Telegram Spyware drainer bot , Guardiam - Safeguard \(help\)](#)

badey1337 - January 15, 2025, 3:31 am

Hi, my name is Badey. I recently became interested in drainers. I found drainers on Telegram pretending to be bots like Safeguard and Guardian. Users make big hits and receive between 20-30 logs per day, depending on their spam strategy, earning around \$30k per month—a profitable business with little effort.

I have access to the source code (Safeguard, Guardian), the correct spam strategies, and I own a VPS and a domain name to host a Telegram drainer.

So, through this post, I'm asking for help to (host) set up the source, as I have no technical knowledge.
