I won't share the match where I placed my bet, but I can tell you that so far my maximum was betting 8,000 bytes.

What about you?

I think I once betted like 2k bytes on a soccer game, which I lost :D

RangoWorld - January 17, 2025, 9:53 am

Probably 5-6K on a single bet.

I have bet 60k\$ on a bet at 1.68, it was a B tennis game, the odds went down to 1.15 as second set started, my player got injured and i lost second set and it was 1-1 , odds was not 3 to 1 my player would win, alas she could just resign the game due injuries and betfairs odds at that time was id get refunded, but she limped entire set 3 and i had the worst loss of my life.... imagine that. thinking about it the game might have been rigged as betfair at that point was player vs player and this was low quality tennis with quite large cap.

The most I bet was 50 bytes I think it was about 2 weeks ago on 2 teams I knew absolutely nothing about. And of course I lost. LOL
