Thread: [Xworm Encryption Problem](#)

Phantom_Services - January 17, 2025, 1:49 am

Hey, currently writing a Crypter and i am having Problems with Xworm.

Loading and running works, but when i run the recovery function it crashes.

I noticed that the exe is x32 but the process runs as x64. If you know whats wrong let me know. also tried runpe for .net x32 but didnt worked.

I also tried injecting my loader with donut into a process and then loading it but didnt worked. Used Assembly.Load() after amsi patch etc, all runs but crashes when i run recovery x64 and x32...

Thanks for your help.

which crypter do you use?

Py_Dev - January 18, 2025, 11:48 am

Assembly.Load() might have an issue identifying xworms entry point. Hope this helps :)

Horus_Protector - January 18, 2025, 11:54 am

This method only works for Windows Defender.

No, it works and xworm connects.

But once i run the recovery option it crashes...

StuntD - March 12, 2025, 4:56 am

is there any Rat out there that is much better than xworm ?
