Thread: [programming languages](#)

kecaye - January 17, 2025, 10:22 am

good afternoon again, is it necessary to know many programming languages to become a hacker?

Its not really necessary to know programming languages for hacking, but it would be a huge plus so if you come across a situation where you need to churn out a fast solution you have the ability to do it yourself.

Hackers - January 17, 2025, 5:50 pm

Exactly, it'll make it easier to hack but you can use tools if you know what to do.

If you don't know a language and don't know how to hack, I recommend learning to code. It's a life skill that can serve you well.

Knowing many languages is beneficial but not that important. Familiarity with various protocols is more useful. Learn C and Python and protocols and you will be good.

kinnu543 - January 17, 2025, 9:57 pm

Don't compulsory but it is an added advantage.

Bastille - January 17, 2025, 10:01 pm

Not necessary but really useful. By the way, there are many programming languages for different purposes (hacking speaking).

I highly recommend you to read my thread : <https://hackforums.net/showthread.php?tid=6263412>
I've made it as I wish I had it when I started 6 years ago.

There is a part about programming, everything is detailed, what are the most used programming languages, how they are used (making malware, hacking tool, hacking systems, ...)
