Thread: [PowerShell vs Command Prompt on Windows - Poll](#)

Hackers - January 18, 2025, 8:55 am

Do you prefer to use cmd or PS?

I still like command prompt, but often I'm using Linux anyways and that's a lot more familiar to me than either Windows cmd or Powershell.

DramaKing - January 18, 2025, 12:49 pm

I can't say that I really have a preference. If I'm just running ssh, netstat, or misc. tools, then it's usually Command Prompt.

RootRXXT - January 26, 2025, 3:22 pm

CMD is good.. Powershell is good...

Some stuff you can only do with PS though, especially if it related to domain related or Azure

Fair enough, yeah if there are things tuned especially for those then that makes sense.

I am on Linux CLI more than PS or Windows CMD

I prefer the Linux terminal as well, most of the hardware firewalls and AP's I use, also has some for of linux or unix type of OS, so makes it easier to manage and maintain
