Thread: [Selling Private Marketing Leads & Tools](#)

Oxycodone - January 19, 2025, 9:07 am

In need of some cash, so for sale I have a few things as a bundle:

Will discuss further over DM any details that are not discussed here.

- 1) Email lists, private email list from a very good source. Large portion are business emails
- 2) Email lists with postal codes , separate from the list above, also private and fresh.
- 3) Source code / method to extract more leads/emails with postal codes as well.
- 4) 2x Marketing Material Providers (physical marketing material such as banners/business cards/mailling services) access (free marketing material , no cost to you)
- 5) 2x Tools to maintain marketing tools (so you have access to marketing materials in the future)
- 6) A private tool I coded that is meant to sort emails, group emails together based on domain name, and give you insight on the domain name / business, and ensure they can receive mail. Stores in local database, great for managing your email lists and organizing it, as well give some insight on who would be a better choice for your email campaigns so you're not stuck sending emails to people who don't fit your needs Also attempts to extra name from emails to give you easy to notice emails that may provide first name / last name basis .

All tools are source code , coded in python. Lists come in form of a .txt file and .numbers file / excel file.

- 7) 3x additional money making methods with these tools , and how I use them to make profits.
- 8) List of names + addresses for direct mailing campaigns aswell

Looking only to sell this to one person, and I have a few other things I can sell along with it privately.

These emails are gained through signups , not from leaked databases.

They cover a wide range of niches due to the nature of the signups, for the most part.

Emails are from various countries, primarily in the United States.

Total count of emails easily exceeds a couple million privately acquired from my own personal method, postal code is included, this is a list of emails, this isnt a good representation im just limited on how many I can post.

The free marketing material alone has saved me thousands in physical marketing material,

with the amount of emails I have, and being private, I dont use them all at once. I target based one my niche, use my tools to grab lists of 1000 at a time, and within 1,000-10,000 emails being sent, I gain a client, finish work for them and so on.

I get on average a reply rate of 1-5% , and from there a conversion rate of another 1-5% depending on the niche of email.

I normally have a client within the first few thousand emails I send. (5,000 emails usually will return 1-5 new customers -- 5 being highest ive gotten for my specific niche)

I also will give you a few ideas on how to make money in other ways aswell , that shouldn't require email marketing really.

Not looking to sell this for any crazy number, but I would like to see what someone can offer. I can also show more of the list privately, or If you want any thing searched, I'll do quick searches and post replies here.
