Thread: [Help Needed with Adult Content Publishing Method \(Tezfiles + ZennoPoster\)](#)

Aladd1nCipher - January 19, 2025, 11:14 am

Hello, Ladies and Gentlemen,

I am here to share a real, working method for making money online, but there's a catch: I don't know the exact steps to make this method work efficiently.

Let me explain:

The Method

This is about publishing adult content and monetizing it through affiliate links.

I have a ready link for premium adult video content hosted on Tezfiles.com. When someone clicks this link, they must purchase a premium subscription to access the content (watch/download). When they subscribe through my link, I earn a commission.

In the future, I plan to upload more rare and exclusive content to grow this method, offering value to subscribers.

What I Need Help With

I am new to this field and don't fully understand the steps required to succeed.

I have access to tools like ZennoPoster (I have a subscription) and Moneyplatform.biz, but I don't know how to effectively use them to promote my content.

I need guidance on how to automate content sharing, drive traffic, and optimize my workflow.

What I Can Offer

I am not here to scam or trick anyone. This is a legitimate opportunity, and I'm looking for constructive help.

If you are experienced with affiliate marketing, adult content publishing, or tools like ZennoPoster, your advice would be invaluable to me.

I promise to give back to those who help me succeed. I deeply value loyalty and gratitude, and I am committed to rewarding those who support me.

The Catch

Right now, I only have one video link ready and a theoretical understanding of how this works. I need help filling the gaps to take this method to the next level.

I cannot share my link here (I understand Hackforums' policies), but the link is legitimate and not harmful to anyone.

If you have knowledge of how to promote adult content, automate with ZennoPoster, or create successful campaigns, please share your insights with me. I am serious about learning and building this method into a sustainable income stream.

Thank you for reading, and I appreciate any help you can provide. Let's collaborate and grow together!

Best regards,
Aladd1nCipher
