Hello, just a thought if cracked RDP's are allowed to be sold on hackforums? I was deciding to make my own shop of cracked rdps but not sure if against the rules.

I know for sure that few years back many here were selling cracked RDPs and even methods on how to get em.

I think if you do, you need a good TOS and wait for the confirmation of someone more experienced in the HF market :)

Based on the [Help Docs](#), the only thing you should be careful of is :

4. No posting of personal information that isn't yours. Privacy is to be respected here. This includes any passwords, logins or dumps.

Otherwise, nothing against it in the [Help Docs](#) or pinned threads.
