Thread: [USA's new CIA director is aware of UFO/UAP in skies](#)

Hackers - January 22, 2025, 9:20 am

He was just confirmed by the Senate. He is a believer and understands that the UAP/UFO issue must be recognized, discussed, and handled transparently. Now is not the time for politics, country vs country, or other BS. When it comes to UAP, we must unite not just in a bipartisan way, but as a species overall.

<https://www.axios.com/2025/01/20/john-ratcliffe-cia-senate-intel-marco-rubio-foreign-relations-state-pete-hegseth-dod>

Here is a video of Ratcliffe tearing Biden apart on the inaction / no public acknowledgement of the UAPs:

<https://www.youtube.com/watch?v=RqWTG66HocQ>

Here is another video:

https://www.youtube.com/watch?v=pPDeuy_Ys0

TLDR:

Our CIA director understands they are real, and will help with disclosure.

Get ready folks, this will happen quick. I tried to give everyone as much notice as possible starting when I had personal experiences with UAP in October. I haven't been well-received, but I have been correct. I will continue to share as much good news as possible. Just stay open-minded, don't make assumptions, don't blame other countries, and accept that we will have some new parameters to consider in the future.

Stanley - January 22, 2025, 8:16 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Kaleb - January 22, 2025, 8:24 pm

Nodes nobody cares about the drones it's literally nothing my lover, no need to bump your thread.

thanks for the free bump.

Jokes on you mate. Check this post periodically and lets review it together.
LMK when you have it in you to admit you are incorrect.

Also I'm just sharing news, no need to make it personal.
Looks like you are against the CIA, multiple governors, multiple directors, and POTUS himself.
It makes you look silly when almost the such a large part of the US government (and multiple other

govs) are saying the same things as me, but you say it is nothing.

Also you should really look at the related threads.

Saying they are just drones is silly at this point lol. They don't even meet the physical definition of a drone.

Aircraft.

I do call them "drones" the same way we call an LLM "AI" - for layman benefits of understanding. But there is absolutely nothing normal about their fleets, or the associated orb sightings.

I'll admit I'm wrong once we have any substantial evidence or disclosure from the government gladly :). It's not going to happen. Suddenly everyones a scholar on drones and aerial phenomenon and we get the most absolutely dogshit videos that are 5 seconds long, cut too early, pan out, etc. I've seen /nothing/ interesting.

Ok

We filmed our own videos and saw many more things off camera too.

You're assuming everyone is just listening to whatever's on the net today and discounting real sightings.

The reason this is important is because the same craft show up in multiple countries. So the most "normal" thing would be that a country just began a takeover, considering how many non-allied countries have the same crafts in the skies.

- if that's your normal explanation for the matching craft in Russia, China, US, Germany, Canada, and like a dozen more then holy shit god bless us all

Know what I mean?

Your alternate solution is frightening.

I am intrigued by the drone reports. I check the Internet every day for something new. ?

So what's the blurry video of the FAA compliant drone today?

Hackers - January 23, 2025, 7:46 pm

You're way too late on this man

Also drones are usually 55lb or lighter

Quite the opposite. I watched all the videos. All the NewsNation videos, everything when the topic was /really/ hot a month or so ago. Nothing convincing, at all. Literally every video I saw was awful quality, clearly a commercial airplane, clearly a regular ass drone.

You know how many times I heard "fleets of 50 drones"? Like, at least 5 or 6 times, apparently from a police officer at one point who had to just stop and take a look for himself. You know how many videos of 50 fleet drones I saw? Zero. What cop or anyone for that matter is gonna see 50 fucking drones in the sky and not think to take their phone out and record it?

[Video: <https://www.youtube.com/watch?v=K98A4CLMwf4>]

Like... what? Even low end phones have pretty good cameras nowadays bro, where's my 50 fleet footage at?
