Has anyone tried DeepSeek AI? If you have, what are your thoughts on it?

I tried it, and it's pretty good for a free AI. I don't have ChatGPT Pro, but if anyone has used both, could you share a comparison?

I haven't tried this myself, but I'll go find it and see how it compares as I use chatgpt religiously.

I have only heard about it being a beast compared to ChatGPT. Haven't looked into it much more than that. I use ChatGPT probably every day now.

I've been using it on and off the past 2 days. I think it compares relatively well to openai's chatgpt. It seems to be a Chinese competitor to chatgpt, and it has its line of restrictions, but fares relatively well.

i have been using it side by side with Gemini, Copilot and Chatgpt... i'd probably rate it better than gemini but, Chatgpt is still best for me.
