I keep getting 'Mission failed, your skills are weak.' in The Hack Game.

What do I have to do to make my skills stronger?

I haven't have any issues with mine so far, maybe like 4 a day of these 'Mission failed, your skills are weak.' Not a lot of them.

All i have is the Proxy and DOS1.0

Is the game an abandoned project? I do not think anything has been done since I played it 2 years ago?

I remember [Omniscient](#) talking about refreshing it a bit, surely he will find some time for us.

I mean it's not even finished? Still seems like to win the hack game you just macro the small hack jobs for xp get the award and call it quits. The game has no 'Ending'?
