Thread: [Videos of bright light transitioning to fixed wing aircraft - UAP](#)

Hackers - January 23, 2025, 8:07 pm

NJ mayor releases a video.

I will say this: say what you want, but I've seen this too many times to count. Hundreds since October.

Many people may say it's just a headlight, but they are always much different and I hope people understand how many people have noticed this exact series of events:

- ball of light hovers in place, and it shines IN EVERY DIRECTION - Not just forwards.
- it will often move, in its ball of light form. Again, shining in ALL directions.
- then it transitions to the drone format with blinking lights

I've been explaining this phenomenon since October and am glad to see better videos coming out.

I've seen a bunch of these, and I even shared a video a while ago for this too (the conversion is at end & nowhere near as clear as this).

I know y'all think I'm tin foil hat guy over here, but I've been giving it to you straight for months. I wish more people would listen.

Disclosure happens fast. Don't make assumptions - but keep an eye out & stay tuned for more.
