(Jan 27, 2025 10:48 AM)Ghostrider53000 Wrote: [\[CITE\]](#) Review of this ISO Rat thingy lol

This remote access tool is an excellent choice for those seeking comprehensive device control and monitoring. Its ability to remotely access a device's camera and video, capture screenshots, and manage text messages provides unmatched convenience. The tool's interface is intuitive, allowing even non-technical users to navigate its features with ease. The remote camera and video functionality are particularly impressive, offering high-quality visuals that can be crucial for surveillance, troubleshooting, or simply staying connected. Additionally, the ability to make calls and manage messages remotely ensures you can maintain communication without being tied to a single device. These features make it a versatile tool for both personal and professional use.

I chose to use this tool because it streamlined my work and improved productivity. Managing multiple devices remotely is crucial for my day-to-day tasks, and this tool's seamless integration across platforms made it the perfect solution. For instance, I was able to monitor a device's environment during a business trip, ensuring everything ran smoothly at home. The remote call and messaging features also saved me time, as I could respond to important communications without needing access to my primary phone. Overall, this tool has proven invaluable for managing tasks efficiently and staying connected, no matter where I am.

Most importantly I have found out that my kids mother was cheating on me with a weirdo. Which I will forever hate her but that I can say without this tool, I would have still been with her being

cheated on.

(Jan 29, 2025 04:47 PM)SevenS7 Wrote: [\[CITE\]](#) This product is amazing, and is just as described.

I'm a fairly skilled "phreak" myself, and I can definitely vouch for this. Great guy and support as well.

Looking forward to see your projects in the future!

Novo - January 25, 2025, 11:18 pm

Interested in a Vouch copy to test out the RAT.

N604 - January 25, 2025, 11:21 pm

I've seen the proof, pretty hard to determine from this short GIF how things are going and if it's even working. I'm willing to test it out and leave detailed feedback/vouch if you're interested.

DramaKing - January 26, 2025, 8:04 am

Why are you not selling this for a hundred or a thousand times this price? Plus, HF is hardly a good place to sell something so legit.

TrackPro+ - January 26, 2025, 8:33 am

(Jan 26, 2025 09:04 AM)DramaKing Wrote: [\[CITE\]](#) Why are you not selling this for a hundred or a thousand times this price? Plus, HF is hardly a good place to sell something so legit.

One reason I am not selling this for a hundred of a thousand times the price is because of audience outreach. Most people would not be easily impressed to spend \$10,000 for a tool this useful. Would you? Most people that own an iPhone or have interest in iPhone do have at least \$166.95. Most people that own an iPhone or iDevice have experienced the downfalls of Find My iPhone. I, personally, feel comfortable knowing exactly where my device is 24/7 in real-time. Additionally, I own some apple devices with faulty hardware and software which lead to some features not working as intended—the tool bridges the gap and allows those devices to fully function again. In conclusion, I am offering an opportunity to utilize the enhanced functionality of a remote tool at an affordable cost with ability to use on multiple devices at zero additional cost.

I do not recommend anyone to utilize this software for illegal purposes. This is not the purpose of the tool, yet it may be of interest to those who intend to use it for illicit purposes.

Rezon® - January 27, 2025, 1:15 am

Can you send me some proof pls, very interested

CompulsivePurchaser - January 27, 2025, 1:38 am

Taking into consideration the non-existent "proof" that was shown on PM and that the account just became active very recently after 3 years of inactivity I would say deal with caution and wait for a detailed vouch review from a very trusted community member.

I do hope a detailed review comes out soon and for you to make a fortune with your product service in case it turns out to be real.

Apollo - January 27, 2025, 7:55 am

Hello, please send me more information regarding this.

JohnW1cks - January 27, 2025, 8:11 am

I'm curious too to see how it work can you send me a DM. If it works i will buy it for sure!

TrackPro+ - January 27, 2025, 9:12 am

Sign up is free at vizionware.app. Installation instructions are also included.

Easy detection: 7 out of 10. User may receive many notifications throughout the day due to method of execution.

Passcode needed? No.

Physical access needed? Not required, but may need if the user doesn't know how to competently follow instructions.

(Mar 10, 2025 01:07 AM)ProxyPlug Wrote: [\[CITE\]](#) OP has multiple accounts clearly commenting himself.

Hey, the trial is free to sign up for. Just add a device and you'll be able to test free of charge. You can pay for additional features, and addons. The UI has been revamped, and I'm positive the user aesthetic is more pleasing.

For those that feel as if this product is not real, then I am willing to provide proof of any specific feature listed in the op. Also, you're not the only one that feels as if the proof is fake. This tool is very real. For those that purchase will be able to utilize the features sent as proof and many more!

Why not just post the video in your original post then you wont have tons of people demanding to be PMd the proof?

Idk, just a thought, because I too would like to see.

You can sign up and link a device for free. I do agree that a video is needed to be uploaded to the main posted however I can no longer edit the original post. I will gladly comment a video or junk this thread and create another.

altmait - January 19, 2026, 2:19 pm

I signed up for it. There's no video, no instructions, jo support.... Doesn't work. I should've know. ?

hackyhacky - January 19, 2026, 8:48 pm

Can't find the installation instructions, where do i get the device confirmation code? What is the download for?

Hey altmait, I apologize for the inconvenience this may have caused you. The client does indeed work. Unfortunately, for the past week, there have been serious upgrades that have caused the system to encounter many issues. Some users experienced a delay in accessing some features.

As far as "no video, no instructions, no support.... Doesn't work" those statements are false as the support page is located at <https://shop.vizionware.app/support>

There was a huge UI change, which you should know if you signed up. The change failed to include necessary privacy policy and terms of service urls as the dev left them null. I am diligently working to get that information updated. In addition, due to your constructive feedback, we will be adding an

interactive first time user display to guide users on how our service works.

Hey hackyhacky,

Vizionware.app is rebranding to TrackPro+ . We've updated a lot of the UI for a fresh user experience. Unfortunately, we did not include the installation instructions in this setup but there is a visible "INSTALL" button on the web page and a "DOWNLOAD" button on the pop up once you click the + sign on the main dashboard page. Once you download and install the shortcut, then you should receive an alert stating the device confirmation code. You enter that code into the text box with the background text "device confirmation code" and press SUBMIT.

You can find a video of how this works on the previous UI on our support page:

<https://shop.vizionware.app/support>

The videos will be updated this month to showcase instructions using the current UI.

altmait - January 21, 2026, 1:08 pm

Hi @TrackPro+!

Thanks for reaching and explaining the current situation. I was able to download the pack, run the automations, claimed the device and added a couple of commands. The UI is beautiful. I haven't seen anything quite like it. Thanks!
