Thread: [\[FREE RAT\] LynxRAT: Quasar RAT Based Project](#)

Ace Yonca - January 24, 2025, 2:19 pm

Hey everyone, ?

I'm excited to announce that I'm working on a new project called LynxRAT, a remote access tool based on Quasar RAT, with a lot of heavy modifications to improve functionality, security, and performance. As I'm just getting started with this, I'd love to hear your feedback!

What features would you like to see in LynxRAT? Any features or improvements you think would make it even better?

I'm open to suggestions and would appreciate any input to make this project more valuable for the community.

Thanks in advance!

Looking forward to your thoughts. ?

TODO LIST:

? Remote Chat (added 25-1-2025)

? Live keylogger

? Remote Webcam

? Live Microphone

You just changed the name!

Do you think people here are that stupid?

Thank you very much by the way that name is so old brought me some nostalgia haha i wish to be called "Ace" :D

mylittlepony8260 - January 24, 2025, 3:53 pm

Thank you very much very nostalgic

Stanley - January 25, 2025, 10:40 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Hidden VNC is probably the only important feature quasar is missing.

I don't see the point of modding quasar, its so easy to do and everyone does it.. in my opinion the best projects are the ones from scratch

What features have you been able to successfully implement ? And what was the motivation behind choosing quasar as the " template"

Ace Yonca - January 29, 2025, 4:18 pm

I've always been a fan of the Quasar project, and it's sad that it was discontinued. Quasar, as a template,

makes it really easy to add features. I'm a lazy programmer, hehe! I can implement most of the essential features a good RAT should have,

like chat, live keylogging, and audio capture. However, college is taking up too much of my time, so

I need more time to push updates.

?
