Thread: [Trump promises to get rid or completely change FEMA](#)

Hackers - January 25, 2025, 9:00 am

Trump is promising that he will overhaul FEMA, or get rid of it completely.

I hope that he puts something else in place before he removes FEMA, considering how many states benefit from this organization.

I'm sure there are ways to improve FEMA, that's for sure. I hope he thinks about that more than he thinks about removing it outright without anything in place for the interim - until his new policies can replace it fully if that's his goal.

(Jan 25, 2025 10:05 AM)Lowkey Wrote: [\[CITE\]](#) Finally some good news. What they did, or I should say didn't do for the people of north carolina is criminal.

I can understand why it's frustrating to see delays and issues with FEMA, but it'll be important for Trump to not just remove FEMA if he has no plan to replace it.

So it's only good news if there's something to help the future victims of North Carolina or any other state with a disaster.

I expect disasters to exponentially worsen over the next few years, and honestly decades. I think it'll be important to have agencies, like FEMA but better than FEMA, that can help in these scenarios.

Quote:FEMA has provided more than \$316 million in cash grants to Western North Carolina survivors, including more than \$6.2 million in rental assistance.

(Jan 25, 2025 12:10 PM)Lowkey Wrote: [\[CITE\]](#) There were no delays. They drained the budget for immigration program funding and when Americans needed it they turned away people trying to help in the high damage areas due to "safety" after not providing help themselves.

This isn't a conspiracy theory or an emotional plea for a forum post. This organization exists for disaster relief and they irresponsibly delegated funding. The whole thing doesn't have to go, as an organization it should exist.

The people running it however should be in jail.

This isn't the first time or a new thing they just started doing. FEMA has been dog water since their handling of Katrina, and before that, nobody knew what the hell FEMA was.

"Hey guys just saw this new thing on TV" lookin asses

God knows where that 300 million came from because there's no way it was fema, will have to deep

dive that later if I care enough.

I think they can be inefficient, sloppy, and misguided, AND also have given over \$300M to North Carolina.

I think all can be true.

I have always felt like the USA is underprepared for widespread catastrophe.

Imagine a multi-state hurricane or other similar event, at the same time as east coast flooding, at same time as major wildfires out west, at same time as ____, etc, etc.

This is 100% possible.

It would be interesting to see what would happen to a multi-state event, especially if certain states had crossovers/overlaps in the regions of different climate events.

This is all in our future because we'll have exponentially worsening weather events, with an increase in volatility and frequency.

Looks like people who survived the cali fires are fucked if this happens.

Yeah, but red states are also disproportionately disadvantaged by this adjustment.

Yes because of Operation Indigo Skyfold. You can see the airplanes 'SPRAYING' in broad daylight.

Plenty of chemtrails & sprays , definitely...

Not sure if we can blame the scale of changes on just that though, and not sure if it's always malicious.

What would their motive be?

What would their motive be?They have been controlling the weather for the past 100+ years.

Motive = \$\$\$

Agriculture is wrecked by the effects. They keep buying farmland.

How are they getting away with this?

So you think they're purposefully harming the climate to lower land prices basically? Or to artificially make areas better and some worse to change global agriculture?

I am more thinking they do not know exactly what they are doing since the effectiveness is so inefficient. It just causes so many problems because the Earth is constantly correcting itself from the spraying. It just becomes an organic chemistry lab in the sky used for research purposes at this point.

I don't know if I Believe in a secret covert program to use chemtrails.

I do believe there are geoengineering projects though

Who knows it's the internet. I have been watching the contrails/chemtrails for so long now but I still remember when they did not exist in my area. It's not normal fuel vapor causing this stuff, something is stuck up there and starts all going together forming ugly clouds, then it gets colder and usually rains the next day.

I've seen a few at day & night lately that do have much more visible chemtrails, that's for sure.

I have thought maybe twice that they were part of the orb/drone phenomenon but I dismissed that and figured they were just plains. There are definitely some that do have much larger trails than normal, seemingly being able to turn on or off. I've seen people say online though that it's just the way those planes fly.
