Thread: [Coinbase Commerce - Alternative?](#)

Spooky - January 26, 2025, 4:42 pm

Since Coinbase has recently required customers using the commerce gateway to link their wallets, I've steered clear. Have any of y'all found an alternative to CC? I am looking for something that has API Documentation and several coin options.

Clue - January 27, 2025, 1:47 pm

Hoodpay, CryptoPayments, CoinPayments, BTCPay

Omniscient - January 29, 2025, 10:29 am

Try NowPayments.io or get your own BTCPay server where you have 100% control.

I'd recommend hoodpay. Especially with cryptocurrencies

StuffSneak - January 29, 2025, 11:29 pm

Nowpayments.io is a good option.

Seems like high fees at 1%+10 cents per.

Nowpayments is just .5%. You can get a BTCPay server starting at \$10 a month, flat fee, no percentages. And you'll have full control.

To be honest, with sellix being taken down i'd recommend to buy a cheap VPS and build a crypto payment processor backend. (No KYC, no fees, no feds)

Yeah, I agree. HF running our own BTCPay server for years now with great success. Linode has a startup wizard to make it easy.
