Thread: [Crypto Scarcity](#)

PappyProxy - January 30, 2025, 6:35 am

Major talk will not the scarcity factor of crypto rise great in the next four years?

As a world player I think it's stronger suited than country based.

1 BTC = 3 MILLION USD 2028?

I don't think it'll go 3 million USD In 2028. More like 2038

GruntStyl - January 30, 2025, 7:35 am

I could maybe see a \$1million BTC by 2028. Only if regulation/mass adoption takes place. Not \$3 million tho, I think it'll take more time.

That's not a bad estimate for the \$3m mark.

\$1m BTC is absolutely coming in the future, just a matter of when. The thing about Bitcoin though is it seems to do multiples very fast. So fast that most miss out. Bitcoin today at \$105k is an absolute steal when you consider it's gonna 10x within 3-5 years. Yet for the moment the market isn't told to BUY BUY BUY. IMHO it's never a bad time to buy Bitcoin.
