- FAQ ([Click to View](#))

Do you ever lose money? Do you cover losses?

We rarely lose any money. We cover all losses.

Will my account/s get banned?

Your account/s will get restricted one way or another, whether it's betting limit, not allowing you to bet but only use casino, send each bet to some kind of trader checks all the time, account closure (rarest one) etc.

Is it possible to lose all money if bookmaker closes my account?

No, if bookmaker closes/bans your account they must allow you to withdraw the money left at the account whether it is only the deposit or deposit+win.

Can I start with 100 eur deposit? Can I do lower than 200?

No, the minimum deposit is 200(eur/usd/gbp) per account.

Can I use the accounts of my family members?

Yes of course, as many accounts as u can get. Every new account under the same bookmaker has to be made via new ip, should be made via new device too, and obviously with the new person's details. Once the account gets restricted, bookmaker flags most these things, if they detect it under another account, it will be restricted too, we don't want that.

When and how do we withdraw or split the money?

Once the account gets restricted, We make a withdrawal request towards your saved withdrawal method, after you receive the money, you send us our part via crypto.

How do I send you your cut after withdrawing?

The payments are being done only via crypto. If you're not familiar with crypto, someone from my team will assist you with it.

Can I get in any sort of trouble for doing this?

Absolutely not. On the legal side, You are not committing any illegal activity by simply betting on your account. Besides that, I am doing everything to keep you safe. I am using the safest proxies for each new account, and I am also using different profiles with different fingerprints for each account. This way they will never connect one account to another.

Why don't you deposit money yourself into the accounts?

Many people reach out to me. If I did that, I would lose a ton of money and time. There are scammers everywhere. You'll have to 'risk' it, just like everyone else did.

Do I get something if I bring you more people? Is affiliate marketing possible?

For such deals, create a ticket in the discord server and we will discuss it, affiliate marketing is possible.

How many accounts do I need to provide in order to get a better cut?

3 accounts at once = 40/60 deal, 5 accounts at once = 50/50 deal

How much can I earn weekly/monthly/daily/per account...?

I have no precise answer to that question. It depends on so many stuff. As already said above, I'll do my best to earn you 100-1000+ per account.

When is the next bet/match ?

We're having matches almost every day, but that doesn't mean that we'll be able to bet on your account on every single match. The process might take up to 2+ weeks depending on so many things. We will do our best to make fast money for all of us, all you have to do is to be patient.

What's the average win/return per account?

As answered above, I don't know, I'm trying to earn you 100-1000+ per account. I don't save any numbers so I don't have the "average" number. You will not lose any money, which is the most important thing. Now, how much will you earn? I'll do my best to earn us both as much as possible, it's depending on the situation, bookmaker, country, etc. At the end, it's free money for you anyways, whether it's 100, 500 or 1k.

Can you work with crypto bookmakers or bet365?

We can't work with crypto bookmakers, we need local bookmakers from your country. In specific countries, we do work with bet365.

Jokes apart, Isn't there any betting sites which need 2FA for withdrawals & stuff to prevent that?

Just looking for more info on how they operate as it is rather vaguely described.

PS. Also looks like someone hasty in their chats.

OP is a newly joined profile and apparently speaks like he experienced the bans before.
Alt much?
Edit: Mistaken for OP

In the sales thread, he mentions the money depositing would be done solely by us but he will be the one doing the bets.

So if the account win bets, he takes a split.

And when it loses bet, we absorb 100% of the loss.

Did I get this right?

FYI the discord SS is not of the OP. It's some other guy posted in their chat.

They talk about absorbing loss as well.

That's why we need more info.

You should answer the questions directly or better yet explain it in the 1st post itself.

Correct, I don't have time to answer here, I don't want to explain things to everyone individually, and I didn't add that much info to the thread because of the design itself, I didn't want it to look messy. The service purpose is well explained at the thread, you get the concept of my business, you provide verified and loaded betting accounts, we make money on those, we split the winnings via crypto, out of that info, people who would be more interested will simply join the server and read more.

So if you're looking for more info please join the server and read other channels.

You are new to this forum and StuffSneak who is more experienced than you in this forum shared tips on getting more exposure and you declined it.

There are ways to keep your thread graphics design clean and add a separate FAQ section that is hidden and only appear when someone clicks it.

You probably have enough people doing accounts for you hence you didn't even need this sales thread. Right?

To anyone who is going to purchase anything from OP, be vigilant and not deal via Discord: Open a contract here. It's the 'Start Contract' button at the bottom of the thread design

You are right, keep in mind that I'm also trying to get popularity on my discord server so I'm also somehow forcing people to join into it, I've though already about setting up a little faq button under the thread, and if I feel like adding it i surely will. Thank you for the tips, this forum seems very serious and I like it!

Also, I can never have enough people, accounts get restricted, clients can't provide unlimited number of accounts.

Tricky, so OP is relying on other users to pay them back their 70% ?

But if this is the case, why do you need access to my account? Given it will be KYC with my name, I would never ever risk my personal info to anyone. If you are trusting me to pay you back in crypto anonymously, why not just trust me to place the bet as you say exactly?

People could set up alerts on Discord or TG and go place the bet, and then honor their word to pay you back. I see 0 reason for you having access to their account, the way you have explained this.

Not possible, my method is private and it has to be done this way for a certain reason, no other way of working is possible unfortunately.

Correct, if you choose to work, you can contact us via alt discord acc in case you don't want your personal info to be connected to the discord/forum account, most reputable people do it like that.

Well, your response does not even remotely explain why you would still need access to somebody else's account, apart from trying to take their funds etc.

Assuming all you do is place a bet, which is what you can only do, because if I use a local betting platform, it's not like you will plug to it's API and do other stuff, you will just place a bet for specific match right? Or am I misunderstanding.

Timo - March 7, 2025, 10:56 am

Hey everyone! Apologies for the delay—here's my honest review of Robin's service.

Quick Note: I used multiple accounts before my initial post in this thread, and those accounts are not included in the profit sheet shared below.

How It Works:

Contact Robin: Share your country, and he'll provide a list of supported bookmakers.

Create Accounts: Sign up on all listed platforms, deposit funds, and share the account details via a ticket on their Discord server.

Wait: Robin's team handles everything, including withdrawals to your bank account.

Profit Split: After withdrawal, you pay Robin and his team their percentage cut from the profit (your initial deposit remains yours).

In rare cases where a loss occurs (due to a single specific, undisclosed scenario, which almost never happens), they refund you the full amount.

The Good:As Advertised: A genuinely risk-free method. If you don't use your accounts for personal betting (which could lead to limits), this is essentially free money.

Smooth Experience: Robin and his team are friendly, responsive, and professional. Minor suggestion: More upfront general info would help, but they've likely addressed this already.

Profit breakdown:

Red: Limited accounts (refunded in full, minimal/no loss).

Yellow: Ready for use (no funds deposited yet).

Green: Profitable (paid out to Robin).

White: Currently active

Total Profit:Post-Review: ~€2.4k profit.

Pre-Review: ~€2k profit.

Overall: ~€4.4k total earnings.

The Bad:

Account Limitations: Lately, more accounts than usual have been restricted. While this isn't Robin's fault (and you're refunded all the money on the accounts, so you don't lose anything), it's frustrating.

Final Verdict:

10/10. This service is real, even though i first thought it was a case of "to good to be true", it's actually true. It's legit, risk-free, and perfect if you have unused betting accounts. Scaling is possible by involving friends/family (share your cut for easy passive income). Highly recommended!

Hey, unfortunately as I've said previously somewhere, this is the only way we can work, I've been in this business for a long time and had many many questions and ideas. You're doing kyc towards the bookmaker, not me, the only things I do on the accounts is login, make bets, make withdrawals. If you still don't feel safe providing accounts from your main discord you can make alt one and contact us that way, like most reputable people do.

What level of personal information do we have to provide?

Also, the level of the personal information depends on a bookmaker and a country you live in, you can google the specifics if you need that info or you can ask me privately at discord, I can ask other people. Also, some bookmakers (France for example) hide all the personal data until you send a verification via phone number to access it, this is rare tho, mostly bookmakers make that info visible obviously, because you're the owner of the account, and you don't have to hide anything from yourself, meaning what can be seen' is only text form info like name, address, phone number, email. You have to keep in mind that I've worked with so many people and never accessed any personal data because that's not in my interest neither it's considered legal. Any personal things that need to be done with your account are done strictly by you. I value my clients and keep them safe in every way possible, at the end of the day, they're the reason I'm making money.

I've been working with a few reputable members on other forums (this forum too, Timo for example), and believe me, I really don't even know their names (which is most of the times constantly visible at the header of the bookmakers website).

You've heard what I had to say about your question, afterwards, I can still understand and respect if you still wouldn't feel safe to provide the account, I don't push anyone, there will always be people that'd be willing to do it.

What do you mean by "credit based books"

Is this delayed betting, or is this something else?

Based on not getting a response. I can only assume that's exactly what it is.

Just in case OP misunderstood, this is not a problem.

Delayed betting is the process of placing a bet after an event has occurred, but before the bookie has reacted to it.

Depending on the country, it is either frowned upon or against TOS depending on the bookie. However they accepted the bet, so they legally cannot NOT pay you.

It is legitimate, and it does work, on some bookies, in select locations.

Just expect that your account will get limited after exactly 1, or potentially 2 bets.

I was interested in maybe working with you, but based on getting banned, and then ignored. I am no longer interested.

Good luck with sales.

Haven't withdrawn payment yet?

(Mar 7, 2025 11:56 AM)Timo Wrote: [\[CITE\]](#) Hey everyone! Apologies for the delay—here's my honest review of Robin's service.

Quick Note: I used multiple accounts before my initial post in this thread, and those accounts are not included in the profit sheet shared below.

How It Works:

Contact Robin: Share your country, and he'll provide a list of supported bookmakers.

Create Accounts: Sign up on all listed platforms, deposit funds, and share the account details via a ticket on their Discord server.

Wait: Robin's team handles everything, including withdrawals to your bank account.

Profit Split: After withdrawal, you pay Robin and his team their percentage cut from the profit (your initial deposit remains yours).

In rare cases where a loss occurs (due to a single specific, undisclosed scenario, which almost never happens), they refund you the full amount.

The Good:As Advertised: A genuinely risk-free method. If you don't use your accounts for personal betting (which could lead to limits), this is essentially free money.

Smooth Experience: Robin and his team are friendly, responsive, and professional. Minor suggestion: More upfront general info would help, but they've likely addressed this already.

Profit breakdown:

Red: Limited accounts (refunded in full, minimal/no loss).

Yellow: Ready for use (no funds deposited yet).

Green: Profitable (paid out to Robin).

White: Currently active

Total Profit:Post-Review: ~€2.4k profit.

Pre-Review: ~€2k profit.

Overall: ~€4.4k total earnings.

The Bad:

Account Limitations: Lately, more accounts than usual have been restricted. While this isn't Robin's fault (and you're refunded all the money on the accounts, so you don't lose anything), it's frustrating.

Final Verdict:

10/10. This service is real, even though i first thought it was a case of "to good to be true", it's actually true. It's legit, risk-free, and perfect if you have unused betting accounts. Scaling is possible by involving friends/family (share your cut for easy passive income). Highly recommended!

Great review. My only issue is, your activity on the forum has been dead since 2023, and your first replies since showing activity again, are you vouching for this thread. Can someone vouch that this is indeed Timo, and not someone who has accessed an account that was no longer being used? I.e.

Has anyone been in contact with this member during his down time on the forum, and can confirm that it is indeed him?

If someone can indeed vouch that this user is Timo. and that it's not someone accessing his account to leave the review.. then I would be interested in giving this a try.

I can vouch for it too, usually methods or services being offered / sold on here are timewasting e-books.

But this shit actually works, waiting to get a bit more money so i can do 5 accounts at once and get

a 50/50 profit split instead of 70/30.

But yeah, I usually don't buy into shit on HF anymore but i've seen this offered on other sites before it started here. But I only decided to do it when OP joined HF because I had no notoriety on those sites if something went wrong but I felt safer doing it on HF.

Turns out it is a good passive income method with no risk apart from chance of accounts being restricted which I have no care for anyway.

There are only a few HQ thread designers out there that don't over-charge.

It's not surprising to see threads with similar designs,

And to anyone who's questions are not answered:

I don't see Robin stating that he only accepts certain countries at any one go.

It's highly probable that your country cannot be worked on as there are some countries' account they can't and will never work on.

Only thing I could do is lose the money on your account, I can't change the data or steal funds, google it or ask ai, it's not possible, we don't work on any fixed matches, our methods are private, even if we did, betting on those is not illegal, organizing them is, educate yourself before salestrashing for no reason.

Big vouch from me.

I've been in the server for a while and have made good money with Robin and his team. I'm personally from the US but it works in multiple countries.

How it works:

1. Provide Robin sportsbook accounts loaded with funds
2. They do the betting on your account
3. Profits get split with you

I won't go into detail about his strategies, but it works.

I'm up around \$30kish at this point and I still have accounts that haven't been used yet. Highly recommend and looking forward to doing more business with him. Also if they somehow lose any funds they cover it so theres no risk on your side.

Here's a small snippet of some earnings:
