Thread: [Looking for HF group](#)

Spikkeljuan - February 2, 2025, 6:40 am

Hello there!

I'm on the lookout for a group of mind-like individuals where i can both contribute with my skills and continue to learn new things or enlarge my knowledge.

What i bring to the table:

School; Bachelor in marketing and now completing my Computer Science bachelor.

Business & E-Commerce; Running a physical store next to digital ones mostly focused on licensing

Software development; Experience with C#, SQL, MQTT, embedded Currently learning; AI

What I Want to Learn & Improve:

Advanced Cybersecurity & Pentesting – Ethical hacking, network security, and malware analysis.

Machine Learning & AI – Applying AI to automation and cybersecurity.

Deeper OSINT Techniques – Advanced data collection and analysis.

Scaling Business & Automation – Growth strategies for digital platforms.

I'm looking for a team or group that focuses on real-world applications, collaborative projects, and continuous learning in any of these areas. I'd love to connect!

Hello and welcome! I'd recommend checking out the different group threads in this subforum, finding which group you connect the best with in terms of values, interests, etc. As well as to see their recruitment process and availability.

Loads of experience. I recommend Fallen or Coders.
