Thread: [Bump button/link](#)

Sholi - February 2, 2025, 8:23 am

Can we have a bump button/link in the My Threads search results page on the far right of each thread?

Usually when I wanna bump my threads that's where I go first. Ik it saves a second or so but it's still less clicks ?

Omniscient - February 2, 2025, 12:12 pm

My guess is that someone can write a browser script for you. Maybe even have AI do it.

But let me think on this before I outright say "no" to the suggestion. Potentially for Vendors I might be able to do something.

The Bump link is simple enough...

https://hackforums.net/misc.php?action=bump&tid=XXXXXXXXX&my_post_key=XXXXXXXXXXXXXXXXXXXXXXXXXXXX

What if I added it to this page: https://hackforums.net/marketcp.php?action=edit_pinnedthreads

Do the Bump link there. And looking at that page, I think it needs some work.

Ooh I didn't think about scripts and stuff haha. Figured it would be something simple though.

Yeah listed threads page works as well. Thanks for looking into it.

+1 for the suggestion.

Currently I am going to each thread & bumping them. This sounds efficient.
