Thread: [The DogeLottery! Play and cross the fingers :D](#)

Footer - February 3, 2025, 1:03 pm

Hi Hack Forums, I'd want to organize a funny lottery for everyone. ?

It is really simple, transparent and fun. ?

For safety reasons the bet is set to 4 DOGE (1.11\$ approx today checking on binance).

I will provide a DOGECOIN address that will change every time the lottery ends, an expire date and a link on DogeChain so everyone can see how many bets are placed and calculate the prize.

To participate you have to send to the address a fixed amount of DOGE, not more not less. If everyone send X and you send Y the amount will be not refunded and added to the prize so read carefully!

The winner will be extracted randomly from the transactions generated on the address and will receive on the sending address the prize.

This is how the price is calculated: will be made a sum of every transaction, and the winner will get 100% of the transactions sum less 2 DOGE I'll taken to cover prize sending fee and lottery management.

Example: the sum of the transactions is 100 DOGE, the winner will get 98 DOGE.

Current bet: 4 DOGE

Send DOGE to address: closed

Ending: Sunday 9, 12AM UTC.

[Monitor the bets here!](#)

For your safety: if you reply this thread, please quote the DOGE address to be sure it will not be changed during the lottery round. ;)

FAQ (constantly updated based on questions eventually):

How to participate?

Send the current bet amount to specified address and cross your fingers already.

How the winner will be chosen?

It will be chosen randomly from the transactions made.

How to monitor the transaction?

Click the dogechain.info link provided.

Why you chose DOGE?

It is well expanded and the transactions are almost free, a crypto adapted for microtransactions.

I have a suggestion.

Suggestion are well appreciated, just reply to this topic.

How much you earn doing this, and why you do it?

I "earn" 2 DOGE, for management of the lottery and the prize sending fee. I do it for fun.

How to know who will be the winner?

Since the transactions are anonymous, the winner must celebrate here!

Can I bet multiple times?

I'd find respectful if everyone bet one time only. It can be discussed here if someone have different idea.

I won but I want the prize on a different address.

Of course you can't! The extracted winner will receive the prize to the same address he sent the bet. So be careful to not delete your address or the prize will be lost forever.

I bet but I want a refund.

If you can proof that sending address is your, refund will be made (minus transaction fee).

What if there are few bets only?

Refund everyone to their respective address.

RootRXXT - February 3, 2025, 1:05 pm

lols keep the interest.. smart man

Foxxxy Proxies Ltd - February 3, 2025, 2:26 pm

Hmmm, not sure how successful this is going to be on HF.

Flan. - February 4, 2025, 5:55 am

This sounds like a fun idea! I might give it a shot and send some DOGE for the lottery. Good luck to everyone participating! ??

No!

You do not quit! lol

Footer - February 8, 2025, 11:49 am

I can't play alone ?

Foxxxy Proxies Ltd - February 8, 2025, 2:21 pm

It was a joke guy. A play on words. Sometimes you have to learn to read between the lines.

Footer - February 8, 2025, 3:14 pm

I'm sorry for the misunderstanding brother. Consider english is not my mother language. ?

Footer - February 8, 2025, 3:23 pm

I accept suggestions. Maybe something of how it is managed is not liked, or simply people don't gamble. But I'm sure people don't trust, in that case, it could be right because no one knows me.? We can try another round.

I've just found a little tweak, someone should quote atleast the doge address. So everyone know it has not been changed during the lottery (until it ends, then it will change).

I've just found a little tweak, someone should quote atleast the doge address. So everyone know it has not been changed during the lottery (until it ends, then it will change).

I think in order for this to be trusted on a larger scale, it would have to be a group sponsored ordeal. Consider joining one of the groups and talking with their leaders to try and do this again.

Footer - February 8, 2025, 3:44 pm

Tomorrow I'll check what groups are. Cause this is new to me. Thank you!

Footer - February 10, 2025, 11:44 am

It is closed, for now!

Two questions

1- how to guarantee its fair ?

2- why dont we just use normal lotery ?
