Q: Does the credential recovery execute alongside the crypted app?

A: Yes. credentials will be sent to a discord webhook provided by the user.

Q: Does the ring3 rootkit persist across reboot? How does it work?

A: Yes it does persist across reboots, and runs with system privileges. Any file, process, or registry key containing 'void_' will be hidden from all processes such as task manager, cmd, explorer, sysinternal tools, ect.

Q: Can the bound file be detected?

A: No. Any files bound must be undetected or windows defender will pop up.

Q: Can I use this to spread malware?

A: No. Any mention of spreading, malware, banking trojans, ransomware, or slaves/victims will result in termination of the license agreement. This software is to be used on machines you own or have consent to operate.

This is new in the market.

Would you be willing to share a vouch copy ?

I work with RATs / Botnets mostly and I can definitely do a through product review for others to see.
