Thread: [After 9 yrs I'm back any tips](#)

wz34a - February 5, 2025, 6:16 am

Hello again I found this account on one of my mails. My journey with HF started probably on nulled 9-10yrs ago. I was LQ member here and leecher there. Next 5 yrs was great, first SE'd items, first db from dorks and many many more. Then I found GF and 9-5 work. Last 3 months was hard to me, I lost job, tense situation with my GF. Anyway, I want to pull myself together, I would like to start making money online again. In 5 days I have a paycheck, I can invest about \$600 from it (in the country I come from it's almost half of my salary, and I wasn't earning the worst). What interesting things can you recommend? My knowledge has stopped at the stage of RMA in Logitech and Steelseries. What is worth pursuing now?

I can share this method for you if you have an android phone:

<https://hackforums.net/showthread.php?tid=6291258&pid=62665656#pid62665656>

It provides not a salary but better than trash you find over the internet, and it's a passive method without investment.

If your projects will be focused on web activities you can contact me for free consultancy.

Hey there, sorry to hear about your tough times recently. Since you have some money to invest, have you considered trying out dropshipping or affiliate marketing? Both can be great ways to make money online with a bit of effort. Good luck with your new venture!

I don't think I have ever said this.

Please for the love of your girlfriend and love of yourself, do not "invest" that \$600 too quickly. You are rushed & in need of cash. This is a recipe for disaster. I have a strong feeling on this one.

If you do buy anything on HF, use a contract and middleman like [Cooligan](#) - he trusted.

I highly recommend that you look for a stable offline job AND look to make money online. I do not recommend that the \$600 goes towards anything until you have more cash coming in. That \$600 could save you & your girl in a bind. If you spend that and have \$0 for 2 months, will she stick around? That's your answer. Save it for an emergency or to extend the time you have to secure a job.

\$25-50 resume formatting / help online

\$150-250 cheap but decent suit/jacket attire or couple collared outfits

\$100 for bus / cheap transportation costs or other logistics during job hunt

\$50-100 for LinkedIn, Indeed, or other platforms with upgrade options

\$100 for food and water

—

I've inflated the prices based on some US pricing. You may get a lot more for \$600 where you are.

There's your investment OP: yourself.

1) girlfriend will see the effort

2) girl will see a handsome man

3) chance of finding a job just spiked up

4) go get it

5) if this plan leaves you homeless and starving, that's just a reason to start sooner and my plan here is better than an ebook method.

I wish you the best on your journey to find something to help with your money issues. I'm also in a similar boat for my reason coming to this site. May we both find success, brother.

Welcome back,

Train yourself for free in prompt engineering and basic marketing skills.

Then think about that 600\$
