Thread: [Email spamming?](#)

Bigtipper69 - February 7, 2025, 8:39 am

Hello just wondering where I can go about learning email spam, without someone trying to rip me off.

So I need a sender on Kali Linux or is it a windows application? I can get smtps and email leads but not sure where to go about actually sending the emails in bulk itself

you cannot bypass gmail's antispam algorithm too hard to bypassing only gmail-gmail can pass without spam so you can buy a bot creating accounts and mass emailing ...

Please clarify buying what types of bots? From where? Also I'm not bothered about it hitting Gmail main inbox as I will be spamming different email providers
