Thread: [New Update on the Advanced Remote Control Tool!](#)

Sonwar - February 8, 2025, 3:02 am

We are developing an advanced remote control tool that offers high performance, enhanced security, and full management of connected devices. ??

? Key Features (++Future):

- ? Fast response and smooth control
- ? Advanced encryption for data protection
- ? Support for thousands of connections simultaneously ??
- ? Comprehensive device management
- ? Multi-platform support
- ? Modern user interface built with WinUI 3 (C++/WinRT) for a sleek and efficient experience
- ? Lightweight and powerful stub written in C/C++ for maximum performance

These are just some of the powerful features — there's much more! ?

We'd love to hear your ideas and suggestions to make it even better. What features would you like to see?

Share your thoughts in the comments or send us a message! ??

I admire the entire ui/ux. You certainly designed an excellent layout. Just ensure that the provided functionality is functional, and you are all set.

Tell me more about Sonwar Tracker Pro

- 1) It's a RAT or a Botnet?!
- 2) It's has HVNC or HRDP features?!
- 3) It's has Rootkit features?!
- 4) Do you have a site?!

takrm - April 13, 2025, 12:50 pm

Where is this rat?

He looks interesting

Do you have a website or contact channel?

I want to buy now
