Thread: [Limited game mode ARURF on League](#)

jcole - February 9, 2025, 12:58 pm

New featured game mode released for the time being. I've been playing it a lot more than any other normal mode. I usually play a lot of ARAM, but really like the random ultra rapid fire. You get a random champion and the cooldowns are extremely low. Fast playing and can get intense too.

Add me on NA-server if you play!

I don't type toxic to people in game. Quickest way to get banned and I have thousands of dollars in my account.. I don't even flame my homies on VC unless you're [mention=5051324].

I /deafen in every game the second it starts, doesn't matter the game mode. URF, Ranked etc. I hate the League Community and 99% of the players have nothing nice to say lol.

I'm hella toxic too, but not flame toxic, more I just afk after the game is like 3-20 or something, the game is so snowbally now and the chance of coming back feels so low, even with the bounties.

Not if the game is 10k gold down and everyone in your team is already given up. If someone has given up so they just full afk push sides because they refuse to play anymore I'm not even going to bother at all. YouTube -> People wasting my time

The toxic trait of League is people refuse to surrender.

Do you only play normal game mode or are you into ranked?

I don't play ranked, Riot thinks I'm a smurf so everytime I play I get put into smurf Queue against against accounts like this.

<https://www.op.gg/summoners/euw/Zeri-only>

<https://www.op.gg/summoners/euw/SMP11-EUW> - Not smurfing but hes literally Emerald 2 55% WR, bro is Diamond 4 skill at a minimum.

So I stopped. I'm not Emerald/Diamond/Master or w/e the rank is of these players are. Not worth it. Losing around 80% of my games to people like this makes me hate Ranked. I'm not playing against people who are marginally better than me giving me the chance to improve, I'm playing against people who regularly spend thousands upon thousands of hours playing and I have absolutely no

chance.

If you're queued up with people that are a lot higher elo or mmr than you then that's because Riot thinks you should be in that ladder

I'm solo, I don't play with anyone on this game, not even in normals. You get put into Smurf Queue if you over-perform in normals. And Riot has decided if you'll be put into Smurf queue before you even reach lvl 15~ when levelling an account.
