Thread: [Bypassing Modern CAPTCHA Systems What Works in 2025?](#)

Shutzhacker - February 12, 2025, 11:03 pm

CAPTCHA systems are getting smarter, but so are bypass methods. What techniques still work against Google reCAPTCHA, hCaptcha, and other verification tools? Have AI-based solvers improved, or are browser automation tools like Puppeteer still effective? Let's discuss the latest advancements in CAPTCHA evasion.

Chill - February 13, 2025, 4:07 am

I don't think AI can really solve captchas for you, there are services whose API if you use are connected with real humans that solve captchas but most such are not reliable.

try 2captcha for solving Captcha they also provide Api's and browser extensions

EvilDeadOfficial - March 2, 2025, 6:33 pm

I'm using 2Captcha with Google Phishlet it's bypass Perfectly but it costs me well.

pyroe - March 2, 2025, 7:15 pm

i got few python scripts that works with 2captcha for sell.
