Thread: [PRIVATE TRADINGVIEW ALGO](#)

Danieldude - February 14, 2025, 1:49 pm

Selling a private tradingview algo, available for test before buying, no bullshit.

1000\$ lifetime and i will invite you to our secret group of trading.

I want the people interested in this drop their username, and if you like the results or have questions dm me.

yes, it's profitable, yes 1000\$ is cheap, yes i could charge at least 10k for something like this.

Peace

I'd like to test before buying. Does this handle just Cryptos, or does it also work for the Stock market?

Occupato - February 16, 2025, 3:41 am

Let's wait, but it seems OP isn't interested in showing some proofs.

I've made hundreds of TV indicators, and I know pinescript, python, and javascript for algo trading in and out. If you'd like a credible vouch review DM me and I'll gladly review it so people know its legit.

Works on every market actually, the method you will have access to works on ranging and trending markets.

Could you be more specific? Does your algorithm run on your own servers, communicating with various APIs (such as news portals, crypto markets, etc.), and then interact with TradingView indicators? Or what is your algorithm based on?

Danieldude - March 2, 2025, 1:46 am

I will not say how it works i will show you a demo if you want :) based on the ticker and the time frame you want and it can be validated live as well. I dont mind but to say how it works i might well give you the strategy.

Im happy to show you results

campusminger - March 2, 2025, 5:32 am

why not offer one vouch copy to a reputed member with detailed review.
you cannot expect people do buy this solely based on few screenshots.
