Thread: [Free VPS for 1 week with OS of choice \[Debian, Ubuntu, CentOS, Fedora, Windows\]](#)

Interconnector - February 18, 2025, 5:18 am

You will not get root access to the dedicated server, you'll get a closed environment on the OS of your choice, though with root access to that.

This is a giveaway, I know, and this is not to sell anything at all, but if you want help setting one up with a VPN(OpenVPN)/Web services/NodeJs/etc.. Do please let me know, I'll gladly assist for free. But if you need higher specs or GPUs, then it's unfortunately not possible for me to provide it for free, as said, I'm not personally selling anything, but we can discuss it if you want one, I might be able to acquire one for free, but if not, I'll guide you through how you get what I give away here for \$5 or even 0 if you have the proper information(not fraud of any kind, it's simply because many providers block the prepaids I use, but a bypass will require a \$5 deposit - but you get extremely much credit for that, the servers I listed are only a fraction of what you get for this method)

Available servers:

Dedicated server

Quote:CPU

Intel Xeon E3 1220

RAM

32 GB

Disks

2 x 1.02 TB SSD (can be expanded)

VPS 1

Quote:CPU(shared)

12 vCPUs

RAM

24 GB

Disks

500 GB NVMe

12 TB/mo

VPS 2

Quote:CPU

4 AMD CPUs (Intel also available)

RAM

8 GB

Disks

160 GB SSD (can be expanded)

5 TB/mo (can be expanded)

Code Terms of use & Rules:

- Boot and lose. Don't try and make a DoS or DDoS attack, I'll shut it down instantly.
- Tor/Al(generally high performance tools is ok)/port scan/mining/related is fine with me, the ISPs doesn't mind either, believe me.
- I don't think there's much to say honestly other than attacking networks with typical DoS/DDoS methods. An exploit that causes a single-request-attack I don't mind if you test that ;)

Tyr - February 18, 2025, 10:52 am

OP hooked me up. Will leave a detailed review later. Was kind enough to customize the location (of which there are many) and offered me assistance with configuring an advanced project.

Highly recommend to the next person lucky enough to get a free copy!

Mclaffe - February 19, 2025, 1:38 am

I'm interested for VPS 1. This is for Windows OS server?

VPS 1

Quote:CPU(shared)
12 vCPUs

RAM
24 GB

Disks
500 GB NVMe

12 TB/mo

Jeronim - February 19, 2025, 2:25 am

Dear OP, I'd be glad to have a copy of your VPS (windows) and of course I'd share a detailed review for your products.

Hoping to be eligible for one.

VPS 1

Unfortunately they don't have Windows. But Ubuntu, Debian, most Linux dists.

Sorry, but Windows is unfortunately not an option, I have edited the thread.

You're welcome to get one of the listed ones. There's a lot of Linux dists.

VPS 1

My provider just got Windows if you're still interested in an RDP

Yes please. I'm interested

I will test and place honest reviews after it.

PM coming your way :)

Kalashnikov_AK47 - March 28, 2025, 5:32 pm

I will be interested in Debian box if this is still available, thanks mate.

DI?E - May 15, 2025, 12:04 am

Still got a dedicated (VPS 1)? I would enjoy that. If not toss me what ya got! Thanks in advance.

Sorry for the late reply.

We can figure that out for a 14 days time. Hit me up if still needed.

sunnybeach52 - July 5, 2025, 9:11 pm

I could do with an ubuntu. i noticed people don't seem to come back and vouch.

It's just like that, I guess. People ask for a server and never use it.

Feel free to hit me up if you really need one.

Yeah. I can imagine. Thanks, I don't need one now (paid for a couple a few hours ago), but will hit you up if I do and you're still giving.

Oh, and let me know if you still need those /24's from May looked into (doubt it.)
