Quote:Russian mercenaries have been accused of executing women and children in Mali where they are fighting for the government against separatist rebels.

The Wagner Group fighters and Malian troops are said to have opened fire on a convoy of civilian vehicles on Monday in an act of revenge after a battle with separatist rebels.

Women and children were reported to be among 24 civilians killed in the incident in the north-east of the West African country.

The Azawad Liberation Front claimed the killings had been in reprisal for its deadly clashes with government and Wagner forces at the weekend.

The Tuareg separatist group said it had killed six soldiers or mercenaries and lost eight of its own fighters, north-east of Annefif in Gao region.

It alleged that after the clashes on Sunday, the army and Wagner executed 24 civilians as they drove towards the border with Algeria, with "enemy forces deliberately spraying bullets into civilian vehicles".

Crazy, the Putin regime's bands of terrorists are most well known for invading Ukraine and killing in what is a genocide against Ukrainian citizens. They have a list of what is hundreds of war crimes in that war alone, if not thousands of crimes. They also continue to terrorize Mali and other places.

It's time for the Putin militia to end so that Russian citizens, Ukrainians, and others can experience true freedom - free from Vlad Putty's influence.
