Thread: [Ddos safety?](#)

Swagmeup - February 20, 2025, 10:24 am

Basically like I recently got hacked some random gave me a file of malware and my downbad self wanting to get the files to help with my gaming unzipped and clicked what the random sent me completely my fault but he got my home wifi ip and password he threatened to ddos me if i didnt pay him is there any way i can like be safe from this or something? Also for the wifi password can he do anything with it? Tahnks in advance

Hi, yes I can remove it from your computer just follow these instructions please:

Please download [Farbar Recovery Scan Tool](#) and save it to your Desktop.

Note: You need to run the version compatible with your system. If you are not sure which version applies to your system download both of them and try to run them. Only one of them will run on your system, that will be the right version. Right click to run as administrator. When the tool opens click Yes to disclaimer.

Press Scan button.

It will produce logs called FRST.txt and Addition.txt in the same directory the tool is run from.

Please copy and paste the logs back here.

Leave your router off overnight. You might be fine regardless because hackers are profound liars. And many scammers pretend to be hackers and make idle threats.

If you need more info, see here:

<https://www.jeffgeerling.com/blog/2022/getting-new-ip-address-dhcp-spectrum-internet>.

Assuming your WiFi password is not re-used anywhere, it is useless beyond knowing it since he would already have access to your machine which is internal beyond NAT.

If this person isn't lying, they'd obviously do more than just grab your cached network password from your machine. Threaten to DDoS you too? They sound retarded.

Did you scan your system to confirm it isn't compromised?

I flashed bios and formatted my ssd as soon as i got in a got a makware bytes and avast anti virus and scanned for rootkits i think ill be fine since before the malware didnt even let me leave bios but i think i should be good now thanks for all the advice!
