Thread: [OTP/2FA bypass?](#)

Shadybird684 - February 21, 2025, 9:47 am

Anybody got OTP/2FA sauce?

Money- - February 21, 2025, 9:53 am

You gotta buy some telegram bots for this. Check the market place.

DramaKing - February 21, 2025, 1:42 pm

No, you gotta buy reactive phishing pages.

Here are some opinion Which can be considered -

- 1 You can do an automated call with the help of otp bots .
- 2 Rat the target devices .
- 3 Phish the target via phishing pages .
- 4 Call the target at same time request an otp for call convenience him to do a conference call and boom ;)

Hey I need help learning to crack into logs and send successful wire and cash out some people I know uses otp bots but I don't have any and some people steal the cookies ect but I'm fresh and I have so much accounts so I want to begin

DiorSavage - October 12, 2025, 10:32 am

there's no secret tbh, thing is simple, if you lookin for "hacker method" that let you get all or at least 1 sms from victim's phone just using terminal or sum like that it doesn't exist, or at least like guy above said you gotta be great hacker. Ppl still doing otp bypass, they just gettin their own innys in

carriers stores like Verizon, AT&T and etc. It range from 1,5K\$ to 5K\$, but most of time they don't sell it, they work for cut/% off scheme, most of work it's bypass OTP in Bank/Invest/Crypto platform, most of them is Crypto cuz all you have to do is withdraw funds to other wallet.

You can also find bots in tele, that gon promise u bypass OTP code, that's how it works

- 1) You enter phone number of ur target
- 2) Choose service
- 3) Login in victim's account and sys sends a code to phone number
- 4) You tap "call" and victim's get it
- 5) If you lucky they will pick up the call and voice say something like "It's Chase security system please enter the code in pad that you got in SMS"
- 6) If you really lucky, they do this and you gettin result in bot

It's social engineering that works only on crackheads. Banks/Crypto and other platforms rolling out everyday 10+post how not to get scammed. Can you get money with it? No. You payin 100-200\$ for that bot and you gon try ur luck. Its literally look like gambling, rather get/create stealer than do that. And one more thing about this bot, there's more than 10 bots in tele, all they have dif design but same code. Because code is leaked like 2-3 years ago, u can find it on github. In situations like this, just ask yourself: if you had a simple tool in your hands that could make you over a million dollars with the right approach, would you publish it and sell subscriptions for \$100-200? Or if you were a good hacker and you got crypto account off stealer/logs that containing a million \$, would you spend time researching how SIM-swapping works with mobile operators?

only way is sim swap with inny thats it

LordMessick - April 23, 2026, 12:46 pm

Do you have any reliable SIM swapping service with like a 95% success rate ?? Especially one that is capable of swapping or forwarding all calls and messages from a landline to a cell number??

Mandymorris0406 - October 4, 2026, 1:35 am

Evilginx2
Modlishka
Nexpisher
SIM Swap
SocialFish

for beginners Evilginx Nexpisher
