We have lowered the price to as low as 0.4\$ per month.

Robert Rouge - April 4, 2025, 5:25 am

What forms of payment do accept? Cheaper to buy 1 year?

Nice reply, I dont understand how someone can talk shit when you are doing the community such a great service! 0.40\$ a month for hosting is great! an this looks like such a awesome service. Good luck with sales ?

Ill buy the plus package if thats okay. making the contract now

Shrdw - April 20, 2025, 4:42 pm

I have no idea how you are selling the lowest package even if you plan on over selling for .40 cents but i will go ahead and open a contact now as well.

One should not have to Google the website, but there is precious little info available even on there. There is no terms of service, no response to live chat, and no list of what is allowed, although there is no mention of the service being bulletproof or anything. All I can say is that the site is US-based and runs on Cloudflare servers.

And they only offer web hosting.

Ah, damn. I wish that you created a contract so you could dispute this.

Sorry for your loss bro.
