Thread: [\[Worldwide\] Semi-Custom Phone numbers \[Send/Receive\] \[SIM, ESIM, Toll-free, etc.\]](#)

Interconnector - February 22, 2025, 8:20 pm

Hello,

I'm providing access to phone numbers of choice(of their lists) - All can be toll-free(US and more), receive/send SMS/calls - mostly spoofed if wanted, US has restrictions at the moment(will be fixed soon)

Countries available:World-wide (only a few countries are dependent on restrictions on registration due to regulations, but can be bypassed for extra)

Price(2 weeks):\$5/Premium numbers - Denmark, Sweden, Norway, Germany, Poland, many EU countries. Let me know if I should check specifics.

\$2/Discovered/leaked SMS centres/Hacked - Worldwide

\$350/Method - Script to search for exact parameters on multiple protocols in order to find relevant services and pentest them. Includes: TCP(SCTP over TCP detection), SCTP(M3UA checks), telco/ISP exposures, SCTP scripts(for encoding GSM MAP messages, Diameter soon, parsing response/request details, accept responses and identify in pcap files. This gives you more than just full access, it gives you an entire backend with switches, nodes, IP addresses associated, apply association configuration for SCTP and allow anonymous associations.

Terms of Service:Premium numbers - No rules, besides I will not be responsible for massive abuse and sudden closure of access due to misuse(excessive spam)

Hacked numbers - Absolutely no rules - but again, your responsibility.

We ALWAYS thrive to satisfy current members and new-comers, support is always available! We're not shy of providing free demos, as we have unlimited access to these numbers.

We can change these terms day-to-day, so please stay updated. We'll never try to scam and say it's now closed. This time we have so many routes that it's impossible for it to get closed this time.

We don't log, but the carriers do, so be aware of testing your own MSISDN.

Policy of Service:All Members - In case the route you use will be closed within 3 months, we'll replace it free.

Access:Send/Receive SMS/CALL unlimited

VoIP also accessible if wanted.

Call centre can be set-up.

Thanks for the update!

I hope it all works out, otherwise you're always welcome to contact me, I can get a real number
instead if this one doesn't fit your demands.

I saw your comment about a panel for numbers. I'd like to be able to access and purchase different numbers, esims, etc.. Do you offer this?

If numbers aren't used for spamming, how long would they last?

Also, will I be able to keep the same number if I extend for another 2 weeks?

Yes, you can extend it for as long as you want.

They'd last a long time. I can't make guarantees, but from the looks of it, it'll be years.
