Thread: [CRYPTER FOR DARKVISION OR RAZAR](#)

TeeTee - February 23, 2025, 9:28 am

Hello I am in search for a good crypter for darkvision or razor rat. It should bypasss WD and score 0/26 on avcheck. Thanks

Sand Ferret - February 24, 2025, 12:04 am

Avcheck is completely useless as it's only scantime. Anyone bragging about bypassing windows defender, or any other AV in scantime only, is a moron.

You likely won't find any good crypting service on this forum.

Hello, feel free to check out my crypting service

we do private crypts with 0/26 avcheck + runtime (very low detections)

:)

I need a crypting service for RAZOR too before purchasing it.

Good afternoon!

I was working with this file yesterday - everything was fine!

Check out my thread - I'll do it for free in exchange for a review.
