Thread: [Google Dork Tool](#)

OtterBot - February 23, 2025, 11:50 am

Hi friends,

I originally posted this in the white hat hacking but thought it could also be useful for all the gray hats as well. It's a automated Google Dork tool that makes custom dorks based on your targets info you provide. Let me know if you have any questions, enjoy having it in your tool kit!

It's a good tool my friend but I'd say keep it to the 1 thread

I don't know how to close or remove it other wise I would, but surly noted.

Stick to one thread : <https://hackforums.net/showthread.php?tid=6293021> (do not cross-post)

If you need to move it from one section to another feel free to ask to Staff, I'm closing this thread, let me know if you want me to move the one in the White Hat.
