Thread: [Vendor Price](#)

Omniscient - February 23, 2025, 1:43 pm

I have increase the cost of the Vendor upgrade to \$150. It's a one time price for the upgrade.

This is current benefits list:

1. HF Contract Template Access
2. Market Profile Vendor Page
3. API Access
4. IP Whitelist (through the API access, api usage not required)
5. Post Edit Ability without time restraints
6. +-5 Popularity Granting
7. Vendor Support (this includes manual reviewing of invalid Disputes/Contracts)
8. Access to Vendor forum
9. Can delete granted Popularity
10. Lower fee for Bytes Bumps
11. 25,000 PM space
12. Unlimited thread replies (auto-close at 2500 replies is disabled)
13. Access to the OMUP program. (work in progress)
14. Signature image limit increased to 1mb.
15. Can use full character set including emoji's in Thread Subjects.

It requires approval and you would apply here:

Thank you.

There's a lot of perks here, still good value for \$150.

Glad I got my Vendor upgrade for \$100, but still a \$50 increase is not an exponential amount for someone wanting to do business here.

Also can't forget the ability to link to autobuy. [Omniscient](#)

Means exactly what it says. If you give someone popularity then you're able to delete it afterwards if you want. Doesn't matter if it's positive or negative.

Being able to change the type and amount of popularity is different than being able to delete it entirely.

\$100 was previous, hope to one day have it \$250

At \$250 I don't doubt there will still be customers.

Is active sales threads a hard requirement?
real tho unless the big man has something clever up his sleeve he is keeping from us as part of his trade secrets

It won't be \$250 until I have more things in place for sellers to make it worth it. Things like Purchasable Colored Thread Titles.

Stop doing too much .

The market place has been dead for a solid year and a half now it's not what it was way before .

Few years back you'd see a new service every 40 minutes now there's barely anything new so I don't know where your getting the justification to charge \$250 for vendor when all other forums don't even charge that much on top of that the marketplace is booming .

Maybe would be better for you if you had a more modern product or service you were offering.

Contracts are actually on the rise so is the amount of new advertisers coming to HF.

It's not "dead" as you put it. If your ready to leave HF and like a closed account just LMK.

Call of duty is pretty modern if you ask me .

I used to sell on HF it's not the first time , the marketplace back then had way more to offer , a lot more I think we both know that .

Heck a seller on here made a Million. I never said anything about 'leaving' or 'closing' my account. I was quoting the other user that you cannot justify \$250 when the marketplace isn't how it used to be .

You said the Marketplace is "dead". I don't think you need to be in our Marketplace anymore if that's the case. You have open Sales Threads, I'm closing them now and banning you from Contracts.

Now your opinion matches the facts, the Marketplace is DEAD to you.

I don't know if I'm in favor of those to be honest. Those just make things confusing to the eyes if all threads become of different colors.

But I get you point. Sure, more features would bring more value for the upgrade for sure.

Just because everybody is not selling stealers/Booters/Crypters anymore doesn't mean market is dead lmao. I & I know for a fact many other vendors get daily sales off HF. It might be your own perspective because you are not getting any sales in your games niche. Doesn't mean nobody is making sales.

I used to list my services on multiple forums but I would get 10 sales off HF out of 1-2 sales off others. & this is my recent experience (pas year or so).

I was actually surprised it was only \$100 when I first joined, I was expecting it to be around \$250-500. The current price is generous.
